The terminal disclaimer filed on 6-7-04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patents 6,416,690 and 6,570,714 has been reviewed and is accepted. The terminal disclaimer has been recorded.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification at page1, lines 11-12 delete "(not yet received – Atty DKT. #ZMSI-001PP1)" and insert – 10/004,454--.

At page 1, line 13 before "which" insert -- now US patent 6,380,314, --.

Authorization for this examiner's amendment was given in a telephone interview with Henry Heines on 7-26-04.

With regard to US patents 6,746,632 and 6,419,858, the claims of these patents do not recite a lens or optical data storage disk as that produced from a reactive plasticizer in an amount to render the composition from which it is produced semi-solid and malleable nor is there any suggestion in the prior art of such a limitation. Therefore the instant claims cannot be said to be an obvious variation of the patented claims and no terminal disclaimer is needed.
